

MYDISH

SPECIAL GREEN EDITION

AUGUST 1, 2007 ~ COMPASS GROUP, THE AMERICAS

Compass Group and the Corporate Social Responsibility Committee are Proud to Introduce Compass Group 360°

You've felt it getting closer, people are starting to talk about it and almost every day you read something about it or hear a news report. It's green - but more than green. It's alive and it's just about to catch up to you, if you're not already in its grip!

Don't be frightened - it's just the cultural and business shift known as social responsibility, and once you understand the issues and know how to speak the language, you'll not only be comfortable with it, you'll want to embrace it!

Compass Group has lead the industry with groundbreaking policies and focus on nutrition and wellness, buying local, purchasing chicken and pork that have reduced use of antibiotics, and using sustainable seafood. The landscape is constantly changing and we continue to look for new issues that may become important to our guests and clients, and to our company.

Beginning today, everything we're doing to meet our responsibility as a world class company will be branded **Compass Group 360°**, indicating, as our tagline says, that it is about **everyone, everyday, everywhere** doing their part to help save our resources, communities and environment, provide our associates and our guests with opportunity for a healthy diet and lifestyle, and doing the right thing in our working lives.

We have also created **The Social Responsibility Guide** designed to bring you accurate and timely information about the issues, the lingo and where Compass and our companies stand on various issues. The Guide will be updated frequently on **MyCompass** (<https://mycompass.compass-usa.com/>) so refer to it often and use the various resource tools and links.

We've also established a one-stop shop for answers to your questions about sustainability. Send your question to compass360@compass-usa.com. We'll do the research and get back to you then we'll post the Q&A in the on-line Social Responsibility Guide.

All of us working together **can** make a difference - *everyone, everyday, everywhere!*
